

IKON

IKL Turret Louvre

Product description

The Ikon Turret louvre is constructed using the Ikon 50mm, 75mm or 95mm blade depending on airflow requirements

Each louvre is individually tailored to meet the customers requirements, both functionally and aesthetically

All projects are assessed individually

Styles include flat topped, sloping, hipped or to a custom design

Inspection/maintenance doors can be integrated as required

Single units can be used for both intake and discharge by the fitting of single or multiple, insulated or non-insulated divider plates

Maximum free area 57% utilizing the IKL75 blade

Low maintenance, constructed from corrosion resistant materials

Larger units are supplied in sections for site assembly

Standard RAL or BS colours. Anodizing to special order

Insect mesh or bird mesh.

Single skin, or double skin insulated blanking panels with or without plenum box

A variety of fixing options are available to suit customer requirements
